Can we connect wireless keyboard to samsung smart tv

Samsung Smart TV is a premium Smart TV with an excellent display and sound system. It uses Tizen operating system and it has its own App Store with streaming apps like Netflix, Prime Video, YouTube TV, and more. The Smart TV supports ultra HDR streaming with Dolby Audio. It provides a TV remote for controlling and you may face trouble with the remote at times. You can try the keyboard or mouse for accessing the content and typing the name in the search on the Samsung Smart TV. Let's see how to connect the wired and wireless keyboard to the Samsung Smart TV. The keyboard not only helps in easy typing of the content but also guides in handling the Smart TV in a better way. We have two types of keyboards, namely wired and wireless. How to Connect Wired Keyboard to Samsung Smart TV The wired keyboard is quite simple to connect to the smart TV and it has a USB cable to connect to the Samsung Smart TV. Most Smart TVs will have multiple USB ports either at the back or at the side of the Smart TV. You can plug the USB cable into the Samsung Smart TV and choose the keyboard language. How to Connect Wireless Keyboard to Samsung Smart TV A wireless keyboard offers two ways to connect to a Smart TV. Most of the keyboards have both USB Dongle and Bluetooth. Only a few keyboards have a USB Dongle alone. How to Connect USB Dongle Keyboard to Samsung TV The keyboard is available with the USB Dongle for instant connection. Take the USB Dongle from the keyboard and connect it to the USB port of the smart TV. Power on the keyboard to use it on the TV. How to Connect Bluetooth Keyboard to Samsung Smart TV (1). Turn on the Wireless keyboard and initiate the Bluetooth pairing. (2). Launch the Samsung Smart TV and go to the Settings. (3). Select General and click External Device Manager. (4). Choose Input Device Manager and select Bluetooth Device List. (5). Look for the Wireless keyboard and select the keyboard. (6). Click Pair and connect the keyboard to the Smart TV. In some older Samsung Smart TVs, you have to enter the PIN that appears on the TV screen for connection. Related: How to Connect Mouse to Samsung Smart TV. Keyboard Shortcut for Samsung Smart TV Keyboard KeysFunctionPage Up/DownScroll the screenF5Go to Home ScreenF6Go to Source ScreenF7Get Channel ListF8Turn OFF the SoundF9/F10To change the VolumeF11/ F12To change the ChannelEnterChoose the Desired itemArrowsMove Across the TVESCGo to the previous screenWindowsGet TV Settings You can connect all types of keyboards to the Samsung Smart TV including, the Apple and Logitech keyboards. Connecting the keyboard to the Samsung Smart TV is made simple with the above method. It can be very helpful if you are using the browsers on the smart TV. If you have any issues while pairing the keyboard, mention them in the comments section. Most Samsung TVs will automatically recognise the device without any change in settings on the TV. To add a USB Mouse or Keyboard, plug your keyboard into the USB port on the back of your TV or One Connect Box, and select the device through the TV settings: Settings > General > External Device Manager > Input Device Manager Bluetooth Keyboards and Mice Connect a bluetooth keyboard to your Samsung TV to make it easier to navigate the settings, use the internet browser, and enter account credentials. While most Samsung TVs are bluetooth enabled, you may need to double check the specifications of your specific TV. Follow the steps below in the dropdowns - the step-by-step guides are divided by year of manufacture. Please note, the following steps are for TVs purchased in India - they can be different for overseas models. 2018 NU Model TVs To add a Bluetooth Mouse or Keyboard, make sure the device is in Bluetooth pairing mode, and select the device through the TV settings: Settings > General > External Device Manager > Input Device Manager > Bluetooth Device List If your device is not detected, move it closer to the TV and select Refresh on the TV screen. The TV will scan for available devices again. Please Note: Connected mice will only work in the Internet app. Using the keyboard and mouse: KeyDescription Directional KeysMoves the focus Windows KeyDisplays the TV settings Enter KeySelects or runs a focused item ESC KeyReturns to the previous screen F1/F2/F3/F4 KeyColour Buttons (Red/Green/Yellow/Blue) F5 KeyDisplays the Home Screen F6 KeyDisplays the Source screen F7 KeyDisplays the channel list F8 KeyMutes the sound F9/F10 KeyAdjusts the volume F11/F12 KeyChanges the channel Page Up/Page DownScrolls a webpage displays in the Internet app Left-click (Mice)Available only in the Internet app. You can click a menu or a link to start a function like you would on a PC. Right-click (Mice)Available only in the Internet app. The options may depend on the selected item, but you can usually Open, Open in a New Tab or Enable Scroll Mode 2017 M/MU/Q/LS Model TVs To add a Bluetooth Mouse or Keyboard, make sure the device is in Bluetooth pairing mode, and select the device through the TV settings: Settings > General > External Device Manager > Keyboard Manager > Add Bluetooth Keyboard Using the keyboard and mouse: KeyDescription Directional KeysMoves the focus Windows KeyDisplays the TV settings Enter KeySelects or runs a focused item ESC KeyReturns to the previous screen F1/F2/F3/F4 KeyColour Buttons (Red/Green/Yellow/Blue) F5 KeyDisplays the Home Screen F6 KeyDisplays the Source screen F7 KeyDisplays the channel list F8 KeyMutes the sound F9/F10 KeyAdjusts the volume F11/F12 KeyChanges the channel 2016 K/KU/KS Model TVs To add a Bluetooth Mouse or Keyboard, make sure the device is in Bluetooth pairing mode, and select the device through the TV settings: Settings > System > Input Device Manager > Add Bluetooth Keyboard & Gamepad Using the keyboard and mouse: KeyDescription Directional KeysMoves the focus Windows KeyDisplays the TV settings Enter KeySelects or runs a focused item ESC KeyReturns to the previous screen F1/F2/F3/F4 KeyColour Buttons (Red/Green/Yellow/Blue) F5 KeyDisplays the Home Screen F6 KeyDisplays the Source screen F7 KeyDisplays the channel list F8 KeyMutes the sound F9/F10 KeyAdjusts the volume F11/F12 KeyChanges the channel 2015 J/JU/J5 Model TVs To add a Bluetooth Mouse or Keyboard, make sure the device is in Bluetooth pairing mode, and select the device through the TV settings: MENU > System > Device Manager > Keyboard Settings > Add Bluetooth Keyboard Select the Bluetooth keyboard from the scan list, and then select Pair and connect. A number will appear on the screen. Enter the number using the Bluetooth keyboard. This will pair the Bluetooth keyboard to the TV. Using the keyboard and mouse: KeyDescription Directional KeysMoves the focus Windows KeyDisplays the TV settings Enter KeySelects or runs a focused item ESC KeyReturns to the previous screen F1/F2/F3/F4 KeyColour Buttons (Red/Green/Yellow/Blue) F5 KeyDisplays the Home Screen F6 KeyDisplays the Source screen F7 KeyDisplays the channel list F8 KeyMutes the sound F9/F10 KeyAdjusts the volume F11/F12 KeyChanges the channel 2014 H/HU/H Model TVs To add a Bluetooth Mouse or Keyboard, make sure the device is in Bluetooth pairing mode, and select the device through the TV settings: MENU > System > Device Manager > Keyboard Settings > Add Bluetooth Keyboard Select the Bluetooth keyboard from the scan list, and then select Pair and connect. By 2020 over 70% of Americans had access to a smart TV, and that number has continued to grow. However, smart TVs continue to have a strong competitor — streaming devices. They may be small, but these devices are powerful and convenient. With so many new high-tech devices coming out each year, you probably have so many questions! Don't worry, we've got the answers. Streaming devices offer new ways to watch your favorite movies and shows, similar to smart TVs. However, let's go over the differences between smart TVs and streaming devices to answer one common question: Is a smart TV better than streaming devices? Plus, we'll cover the advantages and disadvantages of popular devices, like Roku, Apple TV, Amazon Fire TV and Chromecast. What's a Smart TV? When we combine the capabilities of a traditional TV and a computer, we get a smart TV that connects to the internet and allows us to stream movies and shows from Netflix, Hulu and TV programs. Some smart TVs have even more advanced features, including social media apps, photo storage, voice recognition (to change channels and search for apps) and smart home controls. This means your TV could be compatible with smart home devices, including Alexa and Google Home. Photo Courtesy: Jens Kreuter/Unsplash Smart TVs are also easy to use. Plus, there are options that offer great viewing experiences and fair prices. LG Electronics 55-inch OLED TV and TCL's 4K Smart LED TV are a couple of the best smart TVs on the market. If you want amazing picture quality and wall-mount functionality, consider the LG. For a more affordable choice, check out the TCL with its built-in Roku experience and smart home compatibility. However, many folks also talk about streaming devices to watch their favorite movies and shows. Some users prefer streaming devices for their exceptional high-tech features. A streaming device has similar functions as a smart TV. We'll break down the differences and cover popular examples of streaming tools. A streaming device connects to the internet, but it also connects to a TV via an HDMI port. It gives people access to various channels, media apps and online services with the help of a remote. Please note: You can't use a streaming device on its own. You need a TV, monitor or computer to view content from the device. Photo Courtesy: Wikimedia Commons Just like smart TVs, streaming devices are easy to navigate and provide excellent image quality and fair prices. Depending on the device, you can use major video sites like Netflix, Hulu, YouTube and Amazon Prime. Streaming devices also come in the form of small boxes or USB-connection sticks. The top four streaming devices that compete in the market are Roku, Amazon Fire TV, Chromecast and Apple TV. Roku Pros: Roku offers streaming sticks and boxes, such as the Roku Streaming Stick+ and the new Roku Ultra. Many users love Roku for its simple interface and its abundant number of streaming apps. With your Roku remote, you can use voice control to find and watch content effortlessly. Also, the Plus and other models support 4K HDR for an improved viewing experience on your TV screen. Photo Courtesy: Roku Cons: The Roku system has many benefits, but it does have some cons. For instance, premium channels require a monthly fee, and you need to set up subscriptions to access certain channels for live TV. Another drawback is that it only screen mirrors music, photos and videos from your phone's Roku app. Apple TV Pros: Another fan favorite is Apple TV, which comes with impressive features like voice control and the ability to rent videos from the iTunes store. Of course, video services are available on the platform too. All you have to do is download the apps from the App store. If you have a Mac or iPhone, it's easy to integrate them to the TV. For instance, Apple TV supports Airplay, allowing you to connect your Mac or iPhone to the TV screen. Plus, you can listen to your music using Apple Music or podcasts using the Podcast app. It's a solid platform to access all your Apple content. Photo Courtesy: Pikrepo Cons: Apple TV is great whether you're an iPhone or Android user. However, Android users might avoid Apple TV for one big reason. Airplay makes it easy for iPhone users to stream their devices to Apple TV devices. However, streaming content from an Android device to Apple TV is difficult. People who use Windows will face the same issue. The second downside is the price. Apple TV is expensive, costing \$99 or more. Unlike other streaming devices, it only comes in a box version. A USB stick version of Apple TV doesn't exist. Amazon Fire TV Pros: If you're a big fan of Alexa and Amazon Prime's entertainment content, take a look at Amazon Fire TV. The system is also easy to set up and use. Photo Courtesy: Raysonho/Wikimedia Commons Cons: The bad news is you need an Amazon Prime account to access Amazon Prime features. The device doesn't offer unique video content alone. Another issue is that the voice search only works on Amazon-related services. If you want to find a movie on Netflix or Hulu, you have to manually look for it in the app instead of using voice search. Some reviewers also complained that Amazon self-promotes itself too much within the platform. Chromecast Pros: Google offers the budget-friendly Chromecast and the more expensive Chromecast Ultra. Chromecast is unique because you don't need a remote to control it. Instead, you use your phone and laptop to stream. That means you can play or pause right from your own devices (Android or iOS). It also works with Google Home. Photo Courtesy: Google Cons: Some disadvantages of Chromecast include limited streaming options. You can stream from your devices, but you can't connect to every app, channel or file. Roku and Apple TV support more apps and files than Chromecast. For those who are less experienced with a smartphone or computer, streaming with a Chromecast might be more difficult as well. Which Is Better? Streaming devices and smart TVs sound like they have the same functions, right? For the most part, yes. If you already have a smart TV, you don't need a streaming device. However, if you have extra needs or an older smart TV, a streaming device could be a better choice for you. Photo Courtesy: Pxfuel Streaming devices provide more content. If you want endless options for entertainment, a streaming device is more beneficial. Some streaming devices offer software updates to improve the speed, the interface and the apps. For those who despise loading lags, a streaming device is the better option. Another advantage of streaming devices is that they're portable. When you're traveling, you can take it with you to catch your beloved shows and movies. Just make sure Wi-Fi is available. Overall, if you want an inexpensive, portable tool that provides more content and updates to improve its features and interface, go for a streaming device. MORE FROM ASK.COM
